CLIMAT SCREEN

Sustainable Interior Climate

Climat Screen by Forest offers a wide range of advanced daylight filter systems that are especially designed to minimize the entry of solar heat from outside into a room.

The unique features of Climat Screen work bilateral. In the summer the warmth will be kept out and in the winter the warmth will stay inside. The use of the Climat Screen has several benefits such as a saving in the energy costs.

The big advantage of Climat Screen is that it does not darken the space, but it removes all possible annoying glare, reflections in screens, whiteboards and digital whiteboards. In addition, users can regulate the amount of light themselves. This provides a pleasant environment in which people can do their work unhindered and reduces fatigue.

Climat Screen is available with different types of films, depending on the need for more or less light transmittance and external view.

FOREST DS[®]-XL LED – ANTHRACITE FINISH

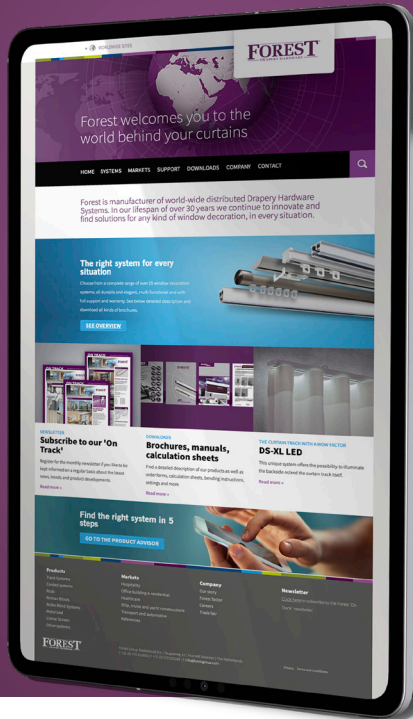

Eyecatcher in every room

Our DS[®]-XL LED is the perfect solution for a lighting plan on a higher level. Now also available in a contemporary anthracite finish, making it suitable to fit in every design.

To summarize, this unique system offers the possibility to illuminate the backside or/and the curtain track itself. Opt for a regular pleated heading or choose for a more dramatic effect for our wave system Forest Easyflex[®].

CRS[®] DECO ROD SYSTEM

Proud to put a ring on it

We proudly present our new curtain rod system; this addition to the current range is very special because for the first time we don't rely on curtain carriers, but offer a curtain rod that can be fitted with Eyelets and Rings.

Rod systems are particularly popular because they have a decorative function. The disadvantages of a traditional system in combination with rings is the amount of noise produced and the inability to operate the curtain when opening or closing. The CRS[®] Deco Rod System is equipped with a special inlay to overcome these issues. This makes it possible to operate the curtain very smoothly and the sound during operation is considerably reduced.

The high-quality aluminium CRS[®] Deco Rod System is available in a rod of 20mm or 28mm diameter. Various colours, including timeless options such as black and white and more trendy shades such as the stainless steel look can be ordered! The Forest Group CRS[®] Deco Rod System combines style together with the latest trends in curtain rods combined with a high level of functionality. That's what we call the Forest Factor!

COLOUR SAMPLES FOR
FOREST ROD SYSTEMS

The ultimate tool
to choose colour

Now you can see it in real life: White, Black, Anthracite, Chrome, Inox, Gold, Bronze, Taupe, Antique in powder-coated or anodized, bundled all together in a colour sampler. In the sampler you'll also find an overview of which colour is available for which system, CRS®, CRS® Deco, CRS® Corded or MRS®. The ultimate tool for yourself or your sales representatives.

NEW FOREST DIAMOND REMOTE WITH AUTO-ON AND INTEGRATED TIMER

Diamond Sense; Indulge your senses

A new addition to the range of wireless controls for the Forest motorized systems with Multi RF protocol has been launched.

This new remote control has an Auto-On mode, when holding your hand above it, the integrated LED light will automatically come on, perfect when waking up in a complete dark room and you want to open the curtains or blinds. Furthermore, this new remote control has an integrated timer function, to allow the user to set fixed open and closing times, for up to 15 systems. Because user-friendliness makes sense; Diamond Sense!

FOREST ECLIPSE DESIGNER COLLECTION

New roller blind fabric
collection book

As you are aware, Forest Group also offers a complete range of roller blinds fabrics, suitable for all roller blind applications. For 2019, we are adding an extra book to the collection, the Eclipse Designer Collection. Whether it's a full blackout, partially transparent or screen fabric, with lots more options to choose from, the perfect roller blind is now available from Forest Group.

SLIM LINE ROLLER BLIND SYSTEMS

Roller Blinds

The range of roller blind systems of Forest Group has grown even further with the addition of the SLIM LINE Closed Cassette, to be used together with the range of Forest Eclipse Contract and Designer fabrics. This elegant system comes standard with a mounting profile and cover cap. The system is available with many different controls options:

- Chain operated
- Crank operated
- Motorised, hardwired
- Motorised, battery

KS® RECESS

Recess
installation

Did you know that the recess version of the KS® track can also be bent? The pre-drilled profile can be bent on the standard KS Bending House with the KS® Recess bending wheel at a radius of just 10cm. The profile can be fitted perfectly flush with the ceiling. Using this rail ensures a finished look and is suitable for all medium weight draperies. Available in white and black from stock.

Did you know?

Did you know that the black versions of the Forest Easyflex®, Easynap® and Easywave® carriers also have black connecting cords? The finishing touch from the curtain engineers at Forest Group!

Did you know that Forest Group has three types of privacy curtain track systems? Besides the regular MTS® system, we also offer an elegant round track profile, the MTS®28mm as well as a rectangular symmetrical version, the MTS® Flat profile?

SHUTTLE® ION

Completely
wireless

The well renowned Forest Shuttle system is now also becoming available in a battery version, ideal for areas where no power point is available.

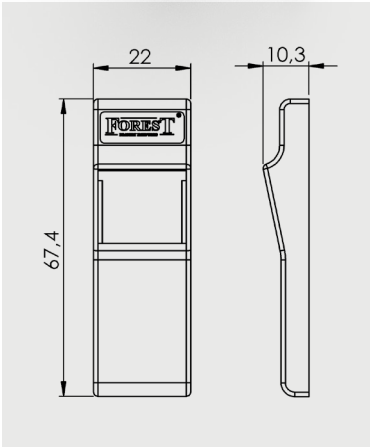

The motor is fitted with a heavy duty battery pack, neatly integrated inside the motor housing. The motor is strong enough to last for 4 to 6 months. Touch Impulse technology is standard, as well as the integrated Multi RF receiver, allowing for an operation by all Forest remote controls. Charging the battery can be easily done with the charging dock, which fits all standard USB/Telephone chargers.

COVER CAPS FOR SMART KLICK®
CEILING BRACKETS AND ALUMINIUM
WALL BRACKETS

Time to
cover it
up

For the ultimate finished look, Forest Group offers special cover caps for the smart click brackets. The cover is easy to attach; it will only take a few seconds. It ensures that the screws are no longer visible. The cap is available in all common colours and is packed per 100 pieces for the ceiling brackets and 50 pieces for the wall brackets.
