1. YOUR BS[®] MOTOR

INTRODUCTION

Thank you for choosing the Forest BS[®] motor.

This guide provides essential information on how to operate, maintain, and maximise the performance of your Forest BS[®] motor.

In this manual, you'll find step-by-step instructions for usage, charging (if you have chosen a battery-operated option), and troubleshooting, as well as tips to ensure safe and efficient operation.

EN

GENERAL

Please read this manual and the safety instructions carefully before using this Forest product.

Follow the instructions in this manual and keep it throughout the entire lifespan of the product.

This manual describes the setup and operation of the BS[®] (battery) motor.

Any use beyond the application scope defined by Forest is not permitted. Ignoring the instructions in this manual voids any liability and warranty from Forest Group.

ACCESSORIES

1x BS Motor (3636000010)

1x Bluetooth Module

1x Manual

OPTIONAL (NOT INCLUDED IN BOX)

- Forest EasyTouch Remote Control (520108X006)

- Set Battery Accesories (3636000002):

-2x Brackets

-1x Battery pack

-1x USB to USB-C cable

- BS Motor 12V Adaptor (1.5mtr) + Extension (2.4mtr) (EU 3636000004 & UK 3636000005)

FEATURES & BENEFITS

- Motor including Bluetooth capabilities
- Works directly with Forest Connect app
- Both cable-operated and battery-powered options available
- 4kg weight load
- Battery charging motor takes 6-8 hours or until the blue light comes on
- Battery motor: 6 month battery life (1 up & 1 down)
- 5 year warranty on motor
- 2 Year warranty on the battery pack

SUPPORTED PROTOCOL

This BS[®] Motor is equipped with the Forest Link[®] protocol.

7. Notice

RECYCLING

Do not dispose of the product with household waste. Ensure that you return it to a collection point or depot for recycling purposes.

8. Support & Technical specification

FAQ

Why isn't the motor working?

- Check if you have paired a remote control. If your remote is not paired yet you need to pair the remote control with the motor by following the pairing instructions in your manual.
- Check if the motor is activ. If the motor is inactive, you can reactivate it by pressing the pairing button twice (poke the button 2 times) to activate the motor.

EN

Why does the motor stop suddenly during operation?

- Check if the upper and lower limits are set correctly. If not, re-set the upper and lower limits according to the instructions in your manual.
- Check if the roman doesn't exceed the rated load.If so, reduce the load on the motor by adjusting the roman or checking that it meets the weight specifications.

Why does the motor only move in one direction?

- Check if the motor's limits are set correctly. If they are incorrect, then cancel the original limits and set new upper and lower limits following the instructions in your manual.

TECHNICAL SPECIFICATION

- Voltage 12Vdc
- Power max. 9.6W
- Current max. 0.8A
- Torque 0.8Nm
- Speed 20/30/40
- Run time max. 6 minutes
- Length 20.8cm
- Diameter 24mm
- Frequency 433.92MHz
- RF range (max.) 30m
- Protection degree IP20
- Temperature 0 - 40°C
