FOREST ATLANTIS®

PRODUCT INFORMATION

- Tube available in 50 mm and 60 mm
- Motorised and chain operated system
- Easy installation with universal adjustable brackets
- Forest tubular motors and controls can be used
- Maximum total weight 26 kg with 13Nm tubular motor
- Silent moving motorised roller blind system.
- Noise level <40 dB(A) / <44 dB(A)
- 3 Nm, 6 Nm and 13 Nm motor types
- Domotics ready
- Tubular motor also available with internal multi receiver and electronic limit setting
- Multiple blinds on a single motor through intermediate brackets
- Cover cassette and side guides available
- Three fitting options: recess, ceiling, wall
- Chain control 1:2
- 50 mm tube supports widths up to 250 cm
- 60 mm tube supports widths up to 300 cm
- 60 mm T6 tube supports widths up to 400 cm
- 50 mm supports height fabrics (0,3 mm) up to 550 cm
- 60 mm supports height fabrics (0,3 mm) up to 400 cm

FOR USE IN

Hotels - offices - residences - boats or anywhere a heavy duty Roller Blind System is required to create maximum black-out or decorative use.

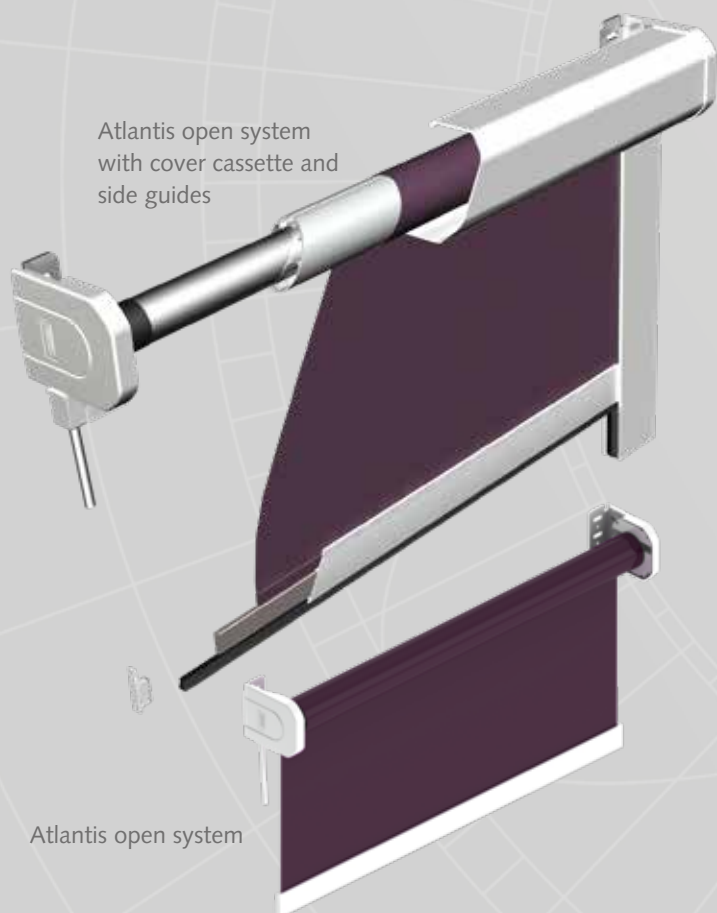

PROFILE

- Sizes : ø 50 mm and 60 mm
- Weight : 850 grams/mtr and 1.200 grams/mtr
- Aluminium extrusion

SPECIFICATIONS

Type	Strength	Speed	Weight load	Noise level	Control options
6/28/S	6 Nm	28 rpm	13 kg	< 44 dB(A)	Switch / Home Automation
6/20/SQ	6 Nm	20 rpm	13 kg	< 40 dB(A)	Switch / Home Automation
13/14/S	13 Nm	14 rpm	26 kg	< 44 dB(A)	Switch / Home Automation
6/28/E	6 Nm	28 rpm	13 kg	< 44 dB(A)	Forest Multi Internal Receiver
5/20/EQ	5 Nm	20 rpm	13 kg	< 40 dB(A)	Forest Multi Internal Receiver
13/14/E	13 Nm	14 rpm	26 kg	< 44 dB(A)	Forest Multi Internal Receiver

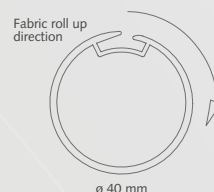

FOREST ATLANTIS® Slim Line

PRODUCT INFORMATION

- Tube available in 40 mm
- Chain or crank operated and motorised system
- Easy installation with universal adjustable brackets
- Forest tubular motors and controls can be used
- Maximum total weight 3,5 kg
- Silent moving motorised roller blind system.
Noise level < 44 dB(A)
- Domotics ready
- Tubular motor also available with internal multi receiver and electronic limit setting
- Multiple blinds on a single motor through intermediate brackets
- Cover cassette and side guides available
- Battery tubular motor also available
- Optional solar panel
- Three fitting options: recess, ceiling, wall
- Supports widths up to 250 cm
- Supports height fabrics (0,3 mm) up to 390 cm
- Chain control options: 1:2 / 1:1
- Crank control: 1-2,5

PROFILE

- Sizes : $\varnothing$ 40 mm
- Weight: 556 grams/mtr and 685 grams/mtr
- Aluminium extrusion

SPECIFICATIONS

Type	Speed	Weight	Noise level load	Control options
12/28/S	28rpm	3,5 kg	< 44 dB(A)	Switch / Home Automation
RF230/32/E	32rpm	3,5 kg	< 44 dB(A)	Forest Multi Internal Receiver

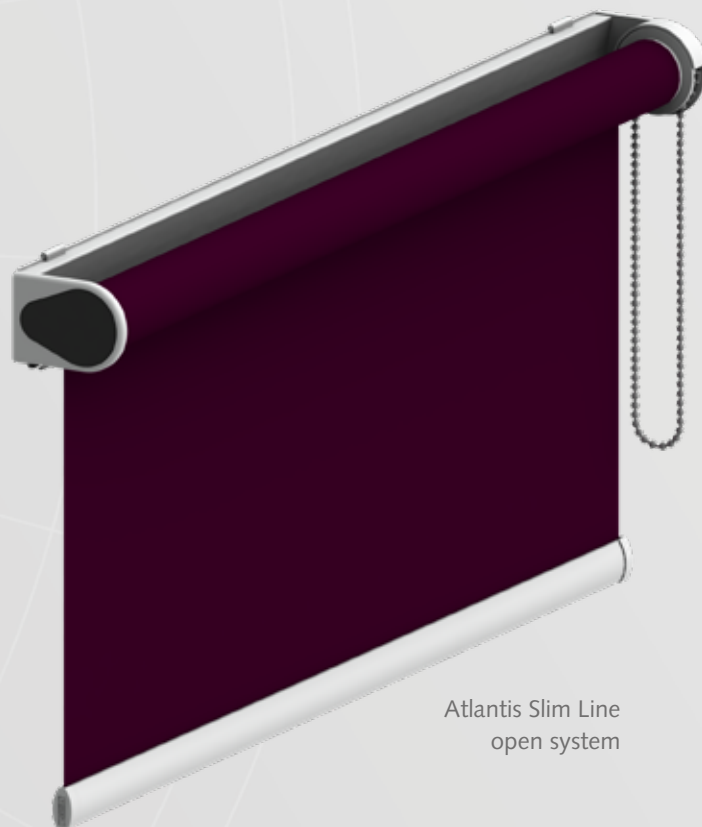

FOR USE IN

Hotels - offices - residences - boats or anywhere a medium duty Roller Blind System is required to create maximum black-out or decorative use.

ATLANTIS® FABRIC COLLECTION

For our Atlantis & Atlantis Slim Line roller blind system, we have a wide range of textiles. This series of special fabrics meets the required high performance and durability for the contract market, which offers a choice of appropriate solutions for each specific lighting condition. In addition to the variations of finishing, we offer finely nuanced traditional contract colours. The range offers eight types of fabrics. Of course, all fabrics are flame resistant.

With a fabric width of 240, 305 and 310 cm, these fabrics are also recommended for large window areas.

FABRIC SWATCH AND DESCRIPTION PACK

Experience the textures and colours of our fabrics in stunning detail with our fabric sampler. This is a very handy reference tool for learning about different fabrics and their composition and qualities. It contains a brief introduction to fabrics, fibres, yarns and weaves as well as 49 different fabric swatches, labelled with their individual details such as name, composition and properties. All in a compact format.

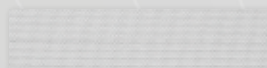

FOREST FG SHADE 3% & 5%

Forest FG Shade is a PVC-coated fiberglass fabric. Based on individual requirements in shading and heat control, you can choose between qualities with openness factors 3% and 5%.

Black

FOREST SHADE 3%

Forest Shade 3% is a PVC-free screen fabric with an openness factor of 3%. The grid-like fabric structure guarantees privacy, preventing people from looking in. At the same time, it allows viewing outside whilst preventing glare.

FOREST ECO BLACKOUT 0%

Forest Group also offers a blackout quality with sustainability in mind, Forest ECO Blackout. This fabric is made of at least 80% recycled polyester. Three to four recycled PET bottles are processed into one square meter of our upcycled material. Recycling extends the life cycle of raw materials, minimizing the demand for virgin resources and increasing sustainability.

FOREST SHADE ALU 3%

Forest Shade Alu exhibits an extremely defined grid structure which still provides excellent transparency at a quite low openness factor of 3%. On one hand, the aluminium backing provides effective glare protection; on the other it is only minimally visible from the front of the product due to the compact yarn structure.

FOREST MEDI BLACKOUT 0%

For specific situations, our collection offers specific fabrics. Our high quality medi-blackout is designed for environments with increased hygiene requirements, such as hospitals and other medical facilities. It relies on the inherent antimicrobial effect of silver.

FOREST ATLANTIS® / ATLANTIS® Slim Line

WORKS WITH

* Only works with actor.

FOREST ATLANTIS® / ATLANTIS® Slim Line is compatible with many other Building Automation systems. A competitive advantage over other motorised drapery systems in the world!

CONTROL OPTIONS

Our broad range of controls make finding a fit for your home even easier; controlling the blinds by hand, remote or even by building automation system. With the remote you can control the roller blind to any position you like. Controlling the motorised roller blind system with your smartphone or tablet, you can create and schedule customised room scenes that allow your roller blinds to operate on their own throughout the day.

REMOTE CONTROL

We offer two types of RF remote controls: the EasyTouch and the Diamond Sense.

- The EasyTouch controls up to 6 systems, with the option to deactivate unused channels.
- The Diamond Sense is a 15- or 2-channel remote with an LED display. Systems can be operated manually or with the integrated timer. The LED display automatically lights up when your hand moves over it.

Both remotes have a range of up to 30 meters.

APP CONTROL VIA FOREST WIRELESS CONNECTOR

The Forest Wireless Connector provides an easy solution to make Forest motorised roller blinds 'smart.' When combined with a smart plug, you can effortlessly control the roller blinds through a mobile app.

Scan for more info

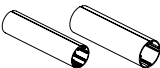

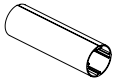

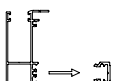

If you prefer to use the Forest Connect App, you can opt for Forest's smart plug. If you wish to operate your roller blinds with Apple HomeKit, Amazon Alexa, or Google Assistant, you will need a compatible third-party smart plug that works with these smart home apps. This RF device can also be seamlessly integrated into the most common building management systems, including systems with dry contacts.

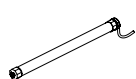

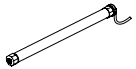

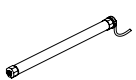

The Forest Wireless Connector works only with the original RF protocol and is not compatible with the Link RF protocol. For more information see Shuttle Series brochure.

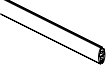

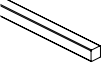

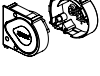

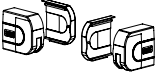

BUILDING AUTOMATION / HOTEL CONTROL

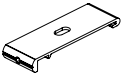

The Atlantis® System can be connected to any Building Automation system, by relay control.
