

# Connecting Google Home

 **The curtains need to be configured and already working in the Forest Connect app!!**

- Install the Google Home app
- Open the Google Home app, and login or register— \* A Google account is required, registering is possible within the app
- Press “+” in the upper left corner
- Press “Set up device”
- Press “Works with Google”
- Typ “Forest Connect” in the searchbar and select “Forest Connect”
- Log in with the Forest Connect App login credentials
- Google Home starts searching for available devices
- Dongle is found, select the dongle and proceed
- Choose the location of the dongle

**Basic commands are;**

“Hey Google open the curtain”  
“Hey Google close the curtain”  
“Hey Google stop the curtain”

The name of the dongle can be changed within the Google Home app, if the dongle is renamed for instance to: curtain bedroom, the Google Home speaker will respond to the following commands:

“Hey Google open the curtain bedroom”

“Hey Google close the curtain bedroom”

“Hey Google stop the curtain bedroom”

After a name change the dongle will always respond to the basic commands open, close or stop.
