

Siri Commands

The dongle already needs to be configured and responding to commands from the Forest Connect app!!

Open the Forest Connect app

Choose  at the bottom of the Forest Connect app

Press  in the upper right corner and choose “ **Launch Tap-to-Run**”

Choose “ **Run the device**”

Select the Forest Wi-Fi Shuttle on which a command needs to be addressed

Choose “**Control**”, select the function (open, stop or close) on which a command needs to be addressed and press “**Save**”.

Press “**Next**”

Choose “**Save**” – We’ve now created a “card” to connect to a command–

Choose at the bottom of the screen “**Add to Siri**” and select the command which needs to be configured

Enter the desired command in the “When I say” box, for instance; “*open the curtains*” and press “**Save command**”

The Siri command is now added and ready for use.
