CURTAINS

INSPIRE, PRESENT & SELL

For home furnishing specialists and interior designers, everything revolves around translating clients' wishes into a compelling overall concept. A strong presentation plays a crucial role in this process. High-quality POS materials not only support the advisory process but also make products visible, tangible, and easy for customers to understand—precisely at the moment when purchasing decisions are made.

FOREST POS-MATERIALS

Forest Group offers a comprehensive range of marketing and sales support materials, specifically developed for interior professionals. From modular display solutions to practical demo cases and well-organized sample books, every tool is designed to present our systems clearly and demonstrate them with ease.

The strength of these solutions lies in the combination of inspiration and clarity. Our point-of-sale materials are designed to both engage and support the sales conversation. They bring structure to the showroom, enhance the presentation of the product range, and make it easier for customers to make informed decisions.

With these POS solutions, Forest Group provides you with the tools to strengthen your sales advice, elevate your product presentation, and guide your customers throughout the entire decision-making process, from the first impression to the final selection, both in the showroom and during on-site consultations.

DISPLAYS

With our Shop-in-Shop display family, you create a consistent and premium brand presentation throughout your showroom. This carefully designed display range consists of four models, varying in size and investment level, ensuring the right solution for every showroom and budget. Each display features the same premium look and refined finish. Together, they create a powerful brand experience, while each display also stands out perfectly on its own. The result is an inspiring presentation environment that reflects the quality, innovation, and craftsmanship of the Forest product range.

THE DISPLAY CONCEPT THAT GROWS WITH YOUR BUSINESS

With interchangeable sample panels, you can customise your display to perfectly match your product range. Select the systems you want to showcase and simply replace the acrylic panels whenever your assortment evolves or new products are introduced. As all sample panels are the same size, they can be used across the entire display family, allowing your presentation to grow effortlessly with your product range.

SHOP-IN-SHOP DISPLAY

This versatile and eye-catching display from the Shop-in-Shop (SIS) range features six rotating display panels with 24 interchangeable sample panels, offering a unique showroom experience while showcasing our complete range of manual, cord-operated and motorised curtain track and curtain pole systems.

Its compact design makes the most of your available showroom space without compromising on presentation or customer experience. At the heart of the display is a motorised designer curtain track with integrated LED lighting, creating a striking focal point.

This display gives customers a clear and comprehensive overview of our curtain track and curtain pole systems, while the high-quality visuals create an engaging and inspiring showroom experience.

approx. 200 x 205 cm

SIS WALL DISPLAY

The compact and stylish Shop-in-Shop (SIS) wall display, featuring three display panels with nine interchangeable sample panels, perfectly complements the Shop-in-Shop display and ensures a consistent brand presentation throughout your showroom.

You decide which systems and sample panels to showcase. Optional header panels are available to clearly identify the curtain track system presented on each panel.

Thanks to its space-saving design, this wall display is the ideal solution for showrooms with limited space, without compromising on appearance or functionality. High-quality visuals are included as standard and can be used to create an even more inspiring showroom experience.

ca. 55 x 170 cm

SIS 360° FLOOR SPINNER

The SIS 360° Rotating Floor Display is a compact and practical solution for showcasing 12 interchangeable sample panels and two visuals.

With a height of approximately 170 cm and a compact footprint, this display fits seamlessly into a wide variety of showroom layouts. It can also be expanded with six additional sample panels, offering even greater presentation flexibility.

You decide which sample panels to display, allowing you to tailor the presentation to your own product range.

Article no: 9902000005

SIS 360° TABLE TOP SPINNER

The SIS 360° Rotating Table Top Display is the most compact model in the Shop-in-Shop (SIS) range, offering space for six or eight interchangeable sample panels.

Ideal for smaller product presentations or as a complement to an existing display, this tabletop solution provides maximum flexibility in a compact format. As with all SIS displays, you decide which sample panels to showcase, allowing you to tailor the presentation to your own product range.

OTHER DISPLAYS

In addition to the SIS display range, we also offer a number of alternative display solutions. These include an acrylic L-shaped display for basic hand drawn systems, an acrylic L-shaped display for Lightblocker pelmet profiles, and a compact premium aluminium display for motorised systems.

ACRYLIC L-DISPLAY ESSENTIAL HAND DRAWN SYSTEMS

This L-display is a cost-effective solution for presenting our essential hand drawn systems. It showcases the KS®, DS® and DS-XL® systems in various colours and mounting options. Thanks to its compact size, it is ideal for placement on a counter or table.

Article no: 9902100002

ACRYLIC L-DISPLAY LIGHTBLOCKER PELMET PROFILE

The L-display for Lightblocker pelmet profiles showcases several Lightblocker options. Thanks to its compact design, it integrates seamlessly into any showroom layout.

Article no: 8881000000

PREMIUM MOTORISED DISPLAY

Crafted from aluminium, the premium motorised display features an integrated handle for easy transport and repositioning. The elegant black powder-coated finish perfectly complements the SIS display range, creating a consistent and premium showroom presentation.

The compact, double-sided display showcases several motorised systems and installation options, including ceiling and wall mounting. A fully operational motorised system, complete with the Shuttle iOn, allows customers to experience the smooth operation and ease of use for themselves.

Article no: 9902600000

FMS PLUS RECESS PANEL

The FMS® Plus Recessed Ceiling Display Panel demonstrates in a clear and elegant way how a recessed curtain track is seamlessly integrated into the ceiling. The panel features a fully operational sample, including the Shuttle® iOn, allowing customers to experience both the appearance, finish and functionality of the system first-hand.

Featuring a straight, centre-closing track, this display panel provides a realistic representation of the FMS® Plus recessed system, perfectly demonstrating how technology and design come together in one seamless solution.

Its compact size makes the panel ideal for customer presentations on location or for stylish display in your showroom.

Article no: 9800000813

DEMO CASES

Bring the showroom experience directly to your customers with our demonstration cases. Designed with a modern look and manufactured from durable materials, these cases offer a professional and premium presentation wherever you go.

Whether showcasing motorised or decorative systems, our demonstration cases present the Forest product range in a clear and attractive way, helping you make a lasting impression on your customers. Each case is supplied complete with brochures and supporting marketing materials.

MOTORISED DEMO CASE

The Motorised Demo Case provides a comprehensive overview of our range of motorised curtain track systems. It includes both profile samples and fully operational systems, allowing you to demonstrate their functionality with confidence.

The Shuttle® curtain motor is included, enabling live product demonstrations. The case also features EasyTouch® control options, allowing you to showcase not only the systems themselves but also the different control methods available.

The demonstration case includes the FMS® system, the FMS® Plus recessed system and the FMS® Dual system. It also features a curved FMS® track, enabling you to demonstrate a variety of applications and installation possibilities.

Article no: 9903000000-V2

DECORATIVE DEMO CASE

The Decorative Demonstration Case provides a comprehensive overview of our curtain pole systems. The case includes both profile samples and complete systems, giving your customers a clear impression of the available options and design possibilities.

It features complete CRS® 20, MRS® and CRS® Deco systems, together with a variety of bracket options and colour samples, making it easy to present different configurations and finishes.

BINDER-SERIES

Our binder collection includes a Sample Binder, a Rod Colour Collection Binder and a Brochure Binder. Together, they provide a practical and professional POS solution. Compact and easy to store, they are always ready to support customer consultations, product presentations and inspire your customers.

Rod Colour Collection Binder

Sample Binder

SAMPLE BINDER
29 SAMPLES
IN 1 BINDER

SAMPLE BINDER

The Sample Binder features approximately 29 profile samples, providing a clear and comprehensive overview of our contract market product range. All manual profiles are grouped on the left-hand side of the binder, while the motorised profiles are positioned on the right. The binder also includes an overview of our Roman blind profiles. This logical layout makes it easy to remove the samples and compare them directly with other systems.

Article no: 9901100001

ROD COLOUR COLLECTION BINDER

The Rod Colour Collection Binder presents the available finishes for the CRS® 20 mm, CRS® 28 mm, CRS® Corded, CRS® Deco, MRS®, CRS® Square and CRS® Rectangular curtain pole ranges through a collection of end cap samples, making it easy to compare colours and finishes.

This provides a realistic representation of every finish, making it easier to assess colours, textures and materials with confidence. The samples are securely mounted within the binder, ensuring a neat, professional presentation.

Each set also includes a Forest cleaning cloth, allowing the samples to be kept clean and presented in perfect condition at all times.

Article no: 9905000000

BROCHURE BINDER

The Brochure Binder perfectly complements the design of the Sample Binder, creating a consistent and professional addition to the complete presentation set. It contains brochures for all product systems, bringing together all relevant product information in one organised place.

This ensures that the right product references and system information are always easy to find during customer consultations, product presentations and project discussions.

Article no: 9901100004

Other sample materials:

SAMPLE SET BATONS

The Sample Set – Batons is a practical collection featuring a selection of high-quality batons in a variety of colours, materials and lengths. Batons allow curtains to be operated smoothly without touching the fabric, helping to extend curtain life while maintaining a clean and elegant appearance.

The set provides a comprehensive presentation of both aluminium and fibreglass batons, making it suitable for a wide range of residential and contract applications.

Article no: 9990000003

SHOWROOM SAMPLES

Let your customers do more than simply look at a curtain track system—let them experience it. With our motorised showroom samples, you create a presentation that immediately convinces. Customers can see the curtain glide smoothly, experience the comfort of motorised operation and hear the quiet performance of the track system. This provides a realistic impression of the system's appearance, quality and ease of use.

Our showroom samples are designed for interior retailers who want to present their collection in a professional and inspiring way. All systems are fully operational and can be fitted with your own curtain fabrics, allowing customers to experience the perfect combination of fabric, confection and technology.

From practical solutions to distinctive designer systems, there is a suitable showroom sample for every showroom and interior style.

FMS® – COMPACT SYSTEM

The FMS® is our most versatile and compact curtain track system, designed to complement virtually any interior style. Thanks to its bendable design, it offers maximum flexibility and is suitable for a wide range of applications.

Features

- Custom system width up to 7 metres
- Available in White, Matt White, Black and Matt Black
- Motor options: Forest Shuttle® iOn or Shuttle® L
- Control via remote control and/or wall switch
- Optional app and voice control
- Suitable for curved installations
- Suitable for pleated curtains
- Single-stack or centre-opening
- Wall or ceiling mounted

MRS® – RAILROD SYSTEM

The MRS® is a true showroom centrepiece. Combining the elegant look of a decorative curtain pole with the convenience of motorised operation, it offers the perfect balance of design and functionality. Its premium appearance immediately captures attention, creating an inspiring presentation that enhances customer engagement. A sophisticated solution for high-end interior projects.

Features

- Custom system width up to 6 metres
- Available in White, Anthracite, Taupe, Stainless Steel, Antique and Gold
- Motor options: Forest Shuttle® iOn or Shuttle® L
- Control via remote control and/or wall switch
- Optional app and voice control
- Suitable for wave curtains and pleated curtains
- Single-stack or centre-opening
- Wall or ceiling mounted

DS-XL® – DESIGN SYSTEM WITH OR WITHOUT LED

The DS-XL® system is a true design statement for any showroom. Combining contemporary design with a luxurious curtain presentation, it creates an impressive focal point. The integrated dimmable LED lighting adds atmosphere and enhances the overall showroom experience.

Features

- Custom system width up to 6 metres
- Available in White and Anthracite
- Powered by the Forest Shuttle® L motor
- Control via remote control and/or wall switch
- Optional app and voice control
- Dimmable integrated LED lighting, controlled via RF remote control or the Forest Connect App
- Suitable for wave curtains
- Single-stack or centre-opening
- Wall or ceiling mounted

FMS® DUAL – BLACKOUT SYSTEM

The FMS® Dual is the ideal system for blackout applications. Thanks to its dual-track design, the curtains close seamlessly in the centre, providing maximum light exclusion and a true blackout solution.

Features

- Custom system width up to 7 metres
- Available in White or Matt Black
- Motor options: Forest Shuttle® L or Shuttle® iOn
- Control via remote control and/or wall switch
- Optional app and voice control
- Suitable for wave curtains and pleated curtains
- Centre-opening
- Ceiling mounted

BCS® – ROMAN BLIND SYSTEM

The BCS® system is a fully operational Roman blind system, allowing customers to experience the elegance of Roman blinds combined with the comfort and convenience of motorised operation.

Features

- Custom width up to 4 metres
- Custom height up to 4 metres
- Available in White
- Maximum curtain weight: 13 kg
- Equipped with a 6/20/EQ tubular motor
- Control via remote control and/or wall switch
- Optional app and voice control
- Wall or ceiling mounted

FMS® PLUS RECESS – RECESSED CEILING PANEL

The FMS® Plus Recessed Ceiling Display Panel is a compact, fully operational display that demonstrates the sleek appearance and functionality of a recessed curtain track system. Its compact size makes it the ideal presentation tool for modern interiors and minimalist design concepts.

Features

- 60 cm fully operational recessed display sample
- Track colour: Matt Black
- Powered by the Forest Shuttle® iOn motor
- Control via remote control and/or wall switch
- Optional app and voice control
- Straight track
- Suitable for pleated curtains
- Centre-opening

THE WORLD BEHIND YOUR CURTAINS

KEY FEATURES OF FOREST SYSTEMS INCLUDE:
